Jedna glavna ideja

Today people are traveling more than before. Why is this the case?

I think more people are traveling because people are earning more money these days and they can afford to travel. Additionally, flights are much cheaper than they were in the past. Moreover, people have very stressful lives these days and need to go on holiday. Furthermore, children expect to be taken on holiday when they are off school during the summer. Finally, it is good for the family to spend time with one another.

In the past, air tickets were only for the rich and famous because most salaries could not cover the price of a flight to a foreign country. This meant that the majority simply stayed at home or took their holidays domestically; however, this has all changed with the creation of budget airlines. Low-cost carriers, such as Ryanair in Europe or Tiger Air in Asia, have meant that anyone can save up and travel to a new country, with prices starting as low as \$1.

Koliko dugačak treba da bude paragraf?

- Nema univerzalno važećeg pravila. Zavisi od ideje koju iznosi i koliko detaljno ta ideja treba da bude razvijena
- Ponekad ćete imati paragrafe od 2-3 rečenice, ali pripazite da ih koristite strateški da istaknete važnu ideju
- Ne bi trebali biti predugački

Kada da započnem novi paragraf?

- Želite da se prebacite na novu ideju
- Istaknete važnu poentu time što ćete je postaviti na početak ili kraj paragrafa
- Želite da prikažete promenu mesta/vremena
- Želite da istaknete kontrast
- Date čitaocima mogućnost pauze

Da li tematska rečenica mora biti prva?

- Ne
- Mada, većina čitalaca je očekuje na prvom mestu i ta lokacija vam može olakšati da naćinite paragraf uniformnim
